

EPA25

Parallel LED Warning

- Parallel LED Warning
- Connected to the detectors LED output
- Determines detector location in places with ceiling floor and raised floor
- Used in areas where it is hard to reach to the detector and/or amount of detectors are excessive
- Compatible with EDS Detectors

Technical Specifications

Model	EPA25
Environmental class	II indoor
Electrical	
Operating voltage	6/12V DC \pm %10
Current consumption	0.1mA - 0.72mA
Warning indicator	3 Red LED
Distance between device and detector	100m
General	
Housing material	ABS Plastic
Housing shape	Standard
External cover color	White
Operating Temperature	-10°C~+60°C
Dimension (HxWxD)	79x79x33mm
Weight	39.4g

Description

Connected to the detectors LED outputs. When the device detects differences in the environment, warning LEDs are activated. Allows user to determine detector location in places with ceiling floor and raised floor. Used to determine the detectors operation in areas where it is hard to reach to the detector and/or amount of detectors are excessive such as in hotel rooms and restricted zones.
